	Summary of Changes
June 11, 1999 Version 1.0	 Added ability for an ESP to request a secondary service of receiving Summary level Interval information for Pennsylvania (See Notes section for description of service). New features include use of a LIN05 value "SI" and use of an account level REF segment "17". If secondary service is not requested, and interval data exists for the account, the ESP will receive interval data and its related summary data in a single transaction (867IU). If the code is sent, the ESP will receive summarized data only on a monthly basis (867IU). Note: This option may not be offered at the account level by all LDCs – some LDCs may only offer it for all customers of an ESP. Added clarification that Rockland Electric's system maintains the duplicate bill and notice to third party. Transaction is considered FINAL in Pennsylvania.
June 29, 1999	Issued as FINAL for New Jersey.
Version 2.0	 Changed "EGS" to "ESP" and "EDC" to "LDC" throughout the guideline. Removed "NJ Definitions" and replaced it with "LDC Definitions" and "ESP Definitions" in the Notes section. Changed LIN01 to say that the tracking number must be unique over all time. Corrected LIN03 to "Identifies the product" instead of "Indicates a customer request t obtain Electric Service" Clarified requirement of REF*17 Corrected spelling errors and formatting. Added "How to use the implementation guideline" page. In addition, changed all headers to the true X12 definition correcting some mistakes that were missed in the upgrade from Version 3070 to Version 4010. Also corrected the Table on Page 4 to reflect X12 definitions and added the words "X12 Structure" to the title on that page. Added examples (Zip+4 on N4, FX & EM on PER, etc.) Updated rules for status and rejection reasons. Combined "PA Implementation" with "PA Use" On the REF*MT & REF*TU segments, changed "This segment must also be sent when account has UNMETERED services available for generation service (Rate Ready)." to "This segment will not be provided in the NM1 loop for UNMETERED services." Changed Note from "One 814 per Account" to "One Account per 814". Clarified text explaining "Rejection vs. Acceptance with Status Reason code" Clarified text explaining "Requesting Summary Only information for Interval Data" Clarified text explaining "Requesting Summary Only information for Interval Data" Clarified Tot I129 "Customer Contract Effective Date" to indicate the Date is require for CE Request only - not all Requests Removed the following note from all QTY02 elements: "Note that a more appropriat segment would be the QTY (quantity), however until we can petition X12 to add a QTY segment to the 814, we must use the AMT segment"
July 2, 1999	Spell check corrections
Version 2.1	Formatting corrections
July 14, 1999 Version 2.2	 Change Control Process Change #001: Corrected On/Off Peak in REF*TU and examples. The codes 41 and 42 were reversed. Corrected X12 code description for REF*IX to "Item Number"
October 1, 1999	Change Control Process Change #004:
DRAFT Version 2.2b	 N1*8R – corrected examples for customer reference number Reordered the REF*7G Error codes alphabetically

November 4, 1999 Version 2.3 November 1999 Draft version 2.3MD1	 Historical Usage, Meter Information and Summary Interval Response Examples - changed "13" to "11" in BGN01 Special Meter Read Example – changed "029" to "021" in multiple request AMT*DP provided in Multiple Response Example (and should not be) Modified Notes section on unknown LIN05 codes to be consistent with other content in Implementation Guide. Added tentative use for Delaware Delmarva Added clarifying note for meter type – if COMBO, only send one REF*MT. Added note for Delmarva indicating they will only be storing 20 characters. Rejection Examples: Remove sending of echoed fields. It is allowed, but is optional, and most utilities will not be sending it. Added clarifying note regarding invalid LIN05 codes Added clarifying note regarding REF03 field for meter ("COMBO" is not valid) This is a FINAL version for Pennsylvania and New Jersey Added Table of Contents Added Table of Contents Added REF03 to REF*BF for special condition for bill cycle for MD
December 23, 1999 Version 2.3MD2	 Clarified Delmarva and Allegheny plans for sending monthly interval data Remove REF*17 (Field 57) from CE Lin Data Dictionary Modified Data Dictionary Customer Name and Billing Name length to allow for 60 for Maryland Clarified APS use of N1*2C (Party to Receive Copy of Bills) Move Maryland Historical Usage notes from REF*1P to General Notes section Remove REF*PRT for Load Cycling Device for Md (this method did not solve issue since it was at meter level and did not indicate quantity) Clarified use of REF*NR for Maryland utilities Added 4 new AMT segments for the Marvland taxes (AAO-Local/County tax, BAK-
	 Added 4 new AMI segments for the Maryland taxes (AAO-Local/County tax, BAK-Franchise tax, F7-State Sales Tax, N8-Environmental tax) Added 2 new AMT segments for Load Management program (L0-Water Heater, 5J-Air Conditioners) Added Rejection Reason codes ANQ (Billing Agent not certified by utility) and C02 (customer on credit hold) to support ESP consolidated billing (PA)
February 24, 2000 Version 2.3MD3	 Clarified County field for N1*8R for Maryland Added City tax for MD Added clarification for APS in MD on sending of 867HU Renumbered items in data dictionary where City added Added FRD as rejection code for MD and DE (Delmarva) - (Bill Option not valid for this type of document)
March 31, 2000 Version 2.3MD4	 Corrected TOC for REF=PR Added MD comment to indicate Historical Usage request was initially only considered for already enrolled customers. Its use for Pre-enrollment still being negotiated as of 3/2000. This transaction is considered FINAL for Maryland
March 31, 2000	Clarified PA Notes on response when using SI secondary service request BY account

814 Enrollment (4010)

May 14, 2000 Version 2.4	 Incorporate PA Change Request X020 – Two new REF*7G codes (NCB and NEB) for supplier consolidated billing Incorporate PA Change Request X022 – Add clarification to Bill Cycle (REF*BF) as relates to summary billing Incorporate MD Change Control M001 – Several tax exemption segments had been added for MD use. After further review, it was determined they are not needed to support generation charges. As MD was only state using these segments, the segments will be removed from the document. They are AMT*C (City Tax), AMT*BAK (Franchise Tax), AMT*AAO (County/Local Tax) and the AMT*N8 (Environmental Tax) segments. This document is a new finalized version of PA and MD. NJ is still using Version 2.3
August 11, 2000 Version 2.4a	 REF*BF – modify NJ Use to reflect what use is. Note that had been added for PA was only addressed for PA. Indicate DE Delmarva and MD as same as NJ. Indicated DTM*MRR not used Day 1 for NJ or DE Delmarva Indicate PSEG does not provide Bill Address information (N1*BT). REF*7G responses for CE – Indicate following codes are not valid for NJ: ANQ, NCB, NEB, RCF Change LIN*1 to LIN*23451 to minimize confusion with people thinking this is a counter within the transaction. Add clarification to PSEG sending of City / State in N4 segment in N1*8R loop. Add clarification to DTM*129 field to indicate PSE&G expects to receive only easter time.
September 10, 2000	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and
Version 2.5 June 15, 2001	Delaware (Delmarva only). REF*7G (Rejection Reason Code) – modified note on rejection code "CO2" to included
Version 2.6	NJ.
October 19, 2001 Version 2.6rev01	 Incorporate Delaware Electric Coop (DEC) information for Delaware Incorporate PA Change Control 027 – Allow use of D30 as a valid rejection code (customer has requested rejections of enrollments by this ESP) Incorporate PA Change Control 029 – ESP Account number should exclude punctuation, and must include significant leading and trailing zeros. Incorporate PA Change Control 031 – Add REF*7G code of UNE to indicate the utility code not be identified. Correct Data Element number (352) for REF03 in REF*BF and REF*SPL segments
December 13, 2001	Incorporate PA Change Control 038 – indicate AMT*7N and AMT*QY must always be
Version 2.6rev02	100% for PA. Also, Change PP&L to PPL EU.
January 9, 2002 Version 3.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
April 5, 2005 Version 3.01PA	 Incorporate PA Change Control 042 - Modify language throughout EDEWG 814 change, enrollment, & reinstatement transactions to agree with the data dictionary for the LIN. Wording change is related to removal of word 'obligation' and replacement with 'contribution'. Deleted note in first bullet under General Notes section, Unknown LIN05 codes, PA Rule Also deleted all references to the SNP code in the REF*7G. The SNP code is not longer I in use by any PA EDC.
January 20, 2006 Version 3.02D	 Incorporate NJ Change Control 003 (Update transaction to reflect actual practice Incorporate NJ Change Control 005 (NJ CleanPower program changes) Note NJ Change Control 003 included creating separate boxes for each state's notes. The text of the other state's notes did not change.
October 23, 2006 Version 3.0.3D	 Incorporate NJ Change Control 008 to reflect NJ CleanPower – unmetered usage for RECO) Incorporate NJ Change Control 009 to reflect NJ CleanPower change for partial usage.
	usage.

Incorporate PA Change Control 050 - changes for 867HI Incorporate NJ Change Control PSEG-E-REF45 and PSEG-E-HI Incorporate MD Change Control RM17-814 Incorporate MD Change Control RM17-HU Incorporate PA Change Control 057 This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware. Incorporate PA Change Control 060 (PA Admin/Cleanup Change Control) Incorporate PA Change Control 061 (Clarify DTM129) Incorporate PA Change Control 065 (Add REFLF and REFSV to NM1 loop) Incorporate PA Change Control 067 (PPLEU Rate Ready) Incorporate PA Change Control 068 (PECO 867HI Implementation) Incorporate PA Change Control 070 (Remove HG from LIN05) Incorporate PA Change Control 073 (Modify language throughout EDEWG 814 change, enrollment, & reinstatement transactions to update wording of AMT*KC and AMT*KZ to reflect appropriate PJM terminology. AMTKC = PLC & AMTKZ=NSPL Incorporate MD Change Control - REF1P (MD notes & use of REF1P for MD) Incorporate MD Change Control - Admin (Admin/cleanup for MD) This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.

February 16, 2012	Incorporate PA Change Control 085 (REF*KY)
Version 4.01	Incorporate PA Change Control 089 (MTI in REF*7G)
	 Incorporate PA Change Control 090 (REF03 in REF*KY)
	Incorporate PA Change Control 093 (Admin Updates)
	 Incorporate PA Change Control 094 (new REF*7G codes)
	Incorporate MD Change Control 008 (clarify PEPCO HU/HI Support)
	Incorporate MD Change Control 010 (PEPCO AMI/Smart Meter Support)
March 8, 2013	Moving to v6.0 to align versions across all transaction sets
Version 6.0	Cleaned up references to Allegheny and APS throughout document
	 Incorporate PA Change Control 095 (REF03 in REF*KY)
	Incorporate PA Change Control 096 (clarify AMT*DP)
	Incorporate PA Change Control 097 (PECO Summary/Interval Support)
	Incorporate PA Change Control 098 (Add LSI code to REF*7G for CE)
	Incorporate PA Change Control 100 (Add support for ESP Referral Program
	Enrollments via EDI)
	Incorporate PA Change Control 101 (remove AMT*LD from request; rescinds CC 58)
	Incorporate PA Change Control 102 (increase REF*BF length in Data Dictionary)
	 Incorporate PA Change Control 104 (rescind CC 100 – ESP Referral Program)
	Incorporate MD Change Control 014 (make REF*LF & REF*SV same as PA)
	Incorporate MD Change Control 015 (add support of 867HI for MD)
	Removed Special Read (SR) as valid code in LIN, no utility in region supports
March 17, 2014	Incorporate PA Change Control 107 (add APA code to REF*7G in CE, HU & HI)
Version 6.1	Incorporate PA Change Control 110 (add NIA & IHA to REF*7G in HI)
	Incorporate MD Change Control 021 (PHI new CIS, changes to 814E)
	Incorporate MD Change Control 028 (BGE support of 867IU)
	Incorporate MD Change Control 030 (Net Meter Indicator in REF*KY)
	Incorporate MD Change Control 032 (BGE pre-enroll HU/HI support)
	Incorporate MD Change Control 033 (BGE LIN handling / response)
	Incorporate NJ Change Control Electric 015 (Net Meter Indicator in REF*KY)
	Incorporate NJ Change Control Electric 022 (ACE new CIS, changes to 814E)
	• Incorporate NJ Change Control Electric 026 (Account arrears in AMT*PJ)
	 Incorporate PA 117 & NJE030 (Add NFI code to REF*7G in CE)

	General Notes
One Account per 814	One customer account per 814.
Tracking number on Request and Response transactions	On the request, the LIN01 is a unique tracking number for each line item (LIN) in this transaction. This number must be unique over all time, and is assigned by the sender of the request transactions. This number must be returned on the response transaction (accept or reject), in the same element (LIN01).
Multiple LINs	 There may be multiple detail LIN loops for each customer account. It is important that the sender order the LIN loops in the order they would like them processed for all primary services. Refer to the LIN segment within this document for a better understanding of primary and secondary services. The sender may send one service per account per 814 instead of using multiple LIN segments.
Response per LIN	 There must be one response LIN for each request LIN. These responses may be created and sent at different times in different 814 transactions, but all LINs must be responded to within the time limits set by the respective Commission.
Rejection vs. Acceptance with Status Reason code	 A Status Reason code is different than a Rejection Reason code. The Status Reason code is used to give additional information to the receiving party (an FYI). For example, if a request for Historical Usage is sent and the transaction is valid, but historical usage is not available for that customer, the transaction is accepted and a status reason code is provided to explain that the historical usage will not be sent. If a transaction is rejected, the requester is expected to follow up and resubmit; whereas if a transaction is accepted with a status reason code, the requester is not expected to take any further action.
LDC Definitions:	The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym: • EDC – Electric Distribution Company (Pennsylvania, Delaware) • LDC – Local Distribution Company (New Jersey) • EC – Electric Company (Maryland)
ESP Definitions:	The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym: • EGS – Electric Generation Supplier (Pennsylvania) • TPS – Third Party Supplier (New Jersey) • ES – Electric Supplier (Delaware) • ES – Electricity Supplier (Maryland)

Unknown LIN05 codes	 PA Rules: If an LDC receives a request for a service that the state does not support, the LDC should reject it with a REF*7G*SDE*SERVICE DOES NOT EXIST If an LDC receives a request for a service that the state supports, but the LDC does not the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED Every utility must provide the ability for a supplier to receive interval data at either the
Requesting Summary Only information for Interval Data (PA Only)	 summary level or the detail level. The defaults vary by LDC PPL EU - the following describes the default interval data levels. If no secondary request (LIN05=SI; REF*17) is sent, Traditional Interval Metered Accounts (e.g., MV-90 meters) will be sent at the DETAIL level (867IU). Non-traditional Interval Metered Accounts will be sent at the SUMMARY level (867MU). Unmetered accounts will be sent at the SUMMARY level (867 MU). PPL does not have non-interval meters. If the EGS sends a secondary request for DETAIL (LIN05=SI; REF*17*DETAIL 867IU would be sent for all except unmetered accounts. This includes both the summary and detail levels. 867MU would be sent for unmetered accounts. If the EGS sends a secondary request for SUMMARY (LIN05=SI; REF*17*DETAIL 867MU would be sent for all accounts. If the EGS sends a secondary request for SUMMARY (LIN05=SI; REF*17*SUMMARY) 867MU would be sent for all accounts. If no secondary request (LIN05=SI; REF*17) is sent, For all accounts, data will be sent at the SUMMARY level (867MU). If the EGS sends a secondary request for DETAIL (LIN05=SI; REF*17*DETAIL 867IU would be sent for all except unmetered accounts. NOTE: PECO does not provide interval data for billing at both the summary and detail levels; Th ESP may receive either summary or detail, but not both. 867MU would be sent for unmetered accounts. If the EGS sends a secondary request for SUMMARY (LIN05=SI; REF*17*SUMMARY) 867MU would be sent for all accounts. If the EGS sends a secondary request for SUMMARY level (867MU).

PLC Tag Calculation The following information may be used to determine the PLC/NSPL effective dates tags received on the Enrollment Response. • ACE – The PLC/NSPL tags on the Enrollment Response are for the period identified by the Service Start Date (DTM*150). • JCPL - If processed the last business day prior to June 1, the "current" tag we be sent. Starting June 1 the "new" tag would be sent. • PSEG – If the tag is processed on the last business day prior to January 1, Ju October 1, the "current" tag would be sent. • Rockland - If processed the last business day prior to June 1, the "current" tag would be sent.	vould ne 1 or
Government Energy Aggregation The following information pertains to the Government Energy Aggregation for the N Electric Utilities • The REF*PG segment is required when the customer is being enrolled into GEA program. • In the event the Supplier omits the REF*PG in the enrollment request, the enroll will process as a regular enrollment request. The Supplier may send EDI 814 C once the customer becomes active. If the 814 Change adding REF*PG is sent v the customer is pending enrollment, the utility will reject the change. • The REF03 element containing the BPU Docket Number of the GEA filing is supported as follows • PSEG: Optional, will store if sent • ACE / JCP&L: Not Used, will not store if sent	ment Thange
 Historical Interval Usage Transaction is optional in New Jersey Atlantic City Electric and JCPL- ACE and JCPL support the EDI 867 Historica Interval Usage transaction summarized to the ACCOUNT level using the SU, B FG loops. ACE and JCPL will process Historical Usage requests as follows:

Maryland – Handling of Pre-Enrollment Historical Usage Requests:	BGE, Potomac Edison, Delmarva, and PEPCO support using EDI to satisfy summary level pre-enrollment historical usage requests for supplier who have met state and utility specific requirements.
Maryland – RM17 814 HU Responses:	The following fields will be sent in the 814 Historical Usage accept response transaction from the LDC to the ESP: Service Address fields (N1*8R - N3, N4, PER segments) Billing Address fields (N1*BT - N3, N4, PER segments)
MD Supplier Consolidated Billing (SCB)	Suppliers serving customers via the SCB bill option are required to print an additional Utility Customer Account Number on the bill. The REF*AAT (LDC Account Number for SCB) is added to SCB Enrollment transactions for supplier to obtain and include on MD SCB bills.
Maryland Energy Assistance Program	 MD PC55 regulations require Suppliers to be certified by the Maryland PSC to serve customer receiving Energy Assistance. MD EDI CC68v2 addresses changes to the EDI 814 Enrollment transaction to support PC55 implementation as follows Add REF02 reject reason code "EAH" to REF*7G For use when non-PSC certified supplier attempts to enroll Energy Assistance Customer based on current information in the Utility System. Add REF*EA (Energy Assistance Customer) to provide the current status of the customer's Energy Assistance to the Utility System at the time of the request or business process event. It remains the sole responsibility of the Supplier to confirm the Energy Assistance status directly with the customer and/or the Office of Home Energy Programs (OHEP). The REF*EA is not indicative of the customer's Energy Assistance for Gas commodity only or if customer moved into utility service territory and was previously receiving Energy Assistance.

Rules for Rejection Reason Codes

The codes on the next several pages have been identified to convey rejection reasons. Only the codes listed for each service are valid for that service.

"A13" (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time "A13" (Other) is used for a new purpose, the utility must inform the EDI Work Group who will determine whether a new code is needed.

Segment: Position: Loop: Level: Usage: Max Use: Purpose: Syntax Notes: Semantic Notes: Comments:	 REF Reference Identification (17=Summary Interval) 030 LIN Detail Optional >1 At least one of REF02 or REF03 is required. 1 At least one of REF02 or C04004 is present, then the other is required. 3 If either C04005 or C04006 is present, then the other is required. 1 REF04 contains data relating to the value cited in REF02.
PA Use:	 Every utility must provide the ability for a supplier to receive interval data at either the summary level or the detail level. The default, except for PPL EU and PECO, is that an ESP will receive interval data at the summary and the detail level. If an ESP wants interval data at both the summary and the detail level the ESP does not need to take any action. For PPL EU, because nearly all customers have interval meters, the default is for the ESP to receive summary data only. If an ESP wants interval data at both the summary and detail levels, the ESP must submit "SI" and include the REF*17*DETAIL segment. For PECO, the default is also for the ESP to receive summary data only. If an ESP wants interval data at the detail level, the ESP must submit "SI" and specify account-level versus meter-level detail via the REF*17 segment. Please note that, unlike PPL EU, PECO does not provide interval data for billing at both the summary and detail levels; The ESP may receive either summary or detail, but not both
	 If an ESP wants to receive interval data at only the summary level, the ESP must: Contact the LDC to determine if the LDC supports summary level data by account or by ESP If the LDC supports summary level interval data by account, the ESP must submit "SI" in the LIN05 to indicate that only summary level interval data is requested for the account. If the LDC supports summary level interval data by ESP, the "SI" in the LIN05 is not used. The ESP must call the supplier interface group at the LDC to request summary level interval data. The LDC will then return summary level interval data for ALL accounts for that ESP. For PPL EU, the default is summary. If an ESP wants interval data at both the summary and detail levels, the ESP must submit "SI" and include the REF*17*DETAIL segment. As stated above, PECO does not provide interval data for billing at both the summary and detail levels; The ESP may receive either summary or detail, but not both. Responses to a Summary Interval Request (LIN05=SI): If the utility does not provide this capability at the account level, they will accept the request, but respond with a Status Reason code (1P) of SNP for "Service Not Provided". If the utility provides this service at the account level, but the account is not an interval account, they will accept the request, but respond with a Status Reason code (1P) of UMA for "Unmetered or non-interval account".

Segment: Position: Loop: Level: Usage: Max Use: Purpose: Syntax Notes: Semantic Notes: Comments:	AMT Monetary Amount (DP=Tax Exemption Percent) 060 LIN Detail Optional >1 To indicate the total monetary amount
PA Use:	 This field is used for the non-billing party to tell the billing party the tax exemption amount that should be entered into the billing party's system in order to calculate a bill on the sender's behalf. This is required only for rate-ready LDC Consolidated billing where the LDC has loaded the ESP rates into their system, the LDC calculates the ESP charges, and places the ESP charges on the LDC bill. The following generic rules are offered to better explain the use of the segment for PA: Residential customers default to '1' (AMT*DP*1~) as 100% tax exempt unless the residence is used for business purposes or vacation home. Commercial customers default to '0' (AMT*DP*0~) being 0% tax exempt unless the customer presents a sales tax exemption certificate. Should the customer have a tax exemption percentage less than 100% but greater than 0%, the value would be reported as a decimal (AMT*DP*.5~). A tax exemption certificate must be secured from the customer. It's the ESP's responsibility to ensure the value in the AMTDP is accurate based on the customer's tax status. Under Rate Ready billing, correcting inaccurate customer bills due to incorrect tax exemption is not the LDC's responsibility and in most cases requires the Supplier to rectify directly with the customer. CE Request: Required if LDC is calculating the ESP portion of the bill Accept Response: Return on response if it was provided on the request All other Reject Responses: Not Used
NJ Use:	Same as PA Note: For Rate Ready, since rate must include taxes, ESP should always set this to 100% tax exempt in NJ.
DE Use:	Same as PA
MD Use:	Not used – Maryland tax exemptions apply to a specific tax. Each tax has a separate AMT segment. The current applicable tax is State Sales tax (AMT*F7)
