	Summary of Changes
March 15, 2008 Version 0.1D	Initial Release for PSEG NJ Change Control.
August 20, 2008 Version 0.1.5D	Incorporate changes for PA
October 2, 2008 Version 0.1.6D	Remove PECO from PA Notes section
August 8, 2009 Version 0.1.7D	Incorporate PA Change Control 056 (PPL field use)
January 24, 2010 Version 1.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
November 4, 2010 Version 1.0.1D	Incorporated PA Change Control 065 (REF*LF and REF*SV) Incorporated PA Change Control 066 (FE HI Implementation) Incorporated PA Change Control 068 (PECO HI Implementation) Incorporated PA Change Control 073 (Update terminology of AMTKC to PLC and AMTKZ to NSPL)
February 28, 2011 Version 2.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
February 16, 2012 Version 2.01	Incorporated PA Change Control 075 (Update UOM codes in QTY03) Incorporated PA Change Control 077 (Add QTY01 Codes) Incorporated PA Change Control 078 (REF*11) Incorporated PA Change Control 080 (Clarify K1 in SU loop) Incorporated PA Change Control 082 (Add/update QTY01 Codes) Incorporated PA Change Control 085 (REF*KY) Incorporated PA Change Control 090 (REF03 in REF*KY) Incorporated PA Change Control 093 (admin updates)
March 8, 2013	 Moving to v6.0 to align versions across all transaction sets Cleaned up references to Allegheny and APS throughout document Incorporate PA Change Control 087 (add DTM segments to be used with QTY*KC and QTY*KZ to denote current and future values) Incorporate PA Change Control 095 (REF03 in REF*KY) Incorporate PA Change Control 101 (remove AMT*LD from request; rescinds CC 58) Incorporate PA Change Control 102 (increase REF*BF length in Data Dictionary) Incorporate PA Change Control 103 (uniform net metering consumption reporting) Incorporate MD Change Control 015 (add 867HI support for Maryland)
March 17, 2014 Version 6.1	 Incorporate PA Change Control 109 (clarify use in PTD*BQ gray box) Incorporate PA Change Control 110 (clarify notes section for PECO Incorporate PA Change Control 114 (add REF*PR to PTD*FG & PTD*RT loops) Incorporate PA Change Control 115 (add PTD*RT loop for PECO) Incorporate MD Change Control 026 (PHI new CIS; changes to HU/HI) Incorporate MD Change Control 028 (BGE support of 867IU) Incorporate MD Change Control 029 (uniform net meter data reporting) Incorporate MD Change Control 030 (Net Meter Indicator in REF*KY) Incorporate NJ Change Control Electric 019 (ACE new CIS: changes to 867HU/HI) Incorporate NJ Change Control Electric 031 (RECO removal from IG) Incorporate NJ Change Control Electric 032 (PSE&G admin updates)
March 14, 2017 Version 6.2	 Incorporate PA Change Control 131 (Add DTM328 to identify data increment change) Incorporate PA Change Control 133v3 (Uniform Daylight Savings Time Reporting) Incorporate NJ Change Control Electric 039 (Uniform Daylight Savings Time Reporting) Incorporate MD Change Control 043 (Future PLC value/date for Potomac Edison) Incorporate MD Change Control 045 (Aggregate Net Metering family identifier REF*AN) Incorporate MD Change Control 046 (Uniform Daylight Savings Time Reporting) Update Delaware Notes to say see Delmarva MD for applicability

	V CISION 0.7
May 18, 2018	• Incorporate PA Change Control 140 (Update to REF*KY gray box)
Version 6.3	• Incorporate PA Change Control 147 (Incorporate Citizens & Wellsboro into IG)
	• Incorporate NJ Change Control Electric 044 (Update to REF*KY gray box)
	• Incorporate MD Change Control 050 (Update to REF*KY gray box)
March 22, 2019	• Incorporate PA Change Control 149 (Add PA Use to REF*AN)
Version 6.4	• Incorporate MD Change Control 054 (Add new REF02 qualifiers to REF*AN)
	• Incorporate NJ Change Control Electric 048 (NJ Note – End of Clean Power Choice)
March 31, 2020	• Incorporate PA Change Control 151v2 (FirstEnergy PA net meter data reporting)
Version 6.5	
April 29, 2023	Incorporate NJ Change Control Electric 055 (JCPL support of HI)
Version 6.6	 Incorporate MD Change Control 068v2 (Add Energy Assistance support)
April 30, 2024	Incorporate PA Change Control 172 (Add PA Note for HU Matrix)
Version 6.9	• Incorporate MD Change Control 083 (Add MD Note for HU Matrix)

General Notes

Use

- Historical Usage will be provided to an ESP upon Request. The request will be made using the 814E documents.
- Historical Usage can be requested for an entity that is already a customer of the ESP
- Historical Usage can be requested for any customer that has not restricted the release of their historical usage. This is state dependent, some states allow this scenario, and others do not.
- The Historical Usage Transaction Set is sent by the LDC only one time per ESP request. No corrections or changes will be transmitted. The Historical Usage data is correct for the point in time that is it requested. Subsequent adjustments to Historical Usage will not be transmitted to the ESP.
 - If providing history totalized for an account, use "SU"/"BQ" (Summary) in PTD01, else if providing history by meter, use "BO"/"PM" (Physical Meter) in PTD01.

LDC Definitions:

The term LDC (Local Distribution Company) in this document refers to the utility. Each state may refer to the utility by a different acronym:

- EDC Electric Distribution Company (Pennsylvania, Delaware)
- LDC Local Distribution Company (New Jersey)
- EC Electric Company (Maryland)

ESP Definitions:

The term ESP (Energy Service Provider) in this document refers to the supplier. Each state may refer to the supplier by a different acronym:

- EGS Electric Generation Supplier (Pennsylvania)
- TPS Third Party Supplier (New Jersey)
- ES Electric Supplier (Delaware)
- ES Electricity Supplier (Maryland)

Renewable Energy Provider Definition: The term Renewable Energy Provider in this document refers to the party that provides Renewable Energy Credits (RECs). This party does not provide generation to the account. Each state may refer to the Renewable Energy Provider by a different acronym:

• GPM – Green Power Marketer (New Jersey)

Note: The transaction will either have an ESP or a Renewable Energy Provider, but not both.

Daylight Savings Time (DST) Reporting

The following formats are required to report Daylight Savings Time (DST).

Spring Daylight Savings Time

60 Minute Interval Increment - Upon the change from Eastern Standard time (ES) to Eastern Daylight time (ED) at 0200, the interval ending 0300 is skipped and the interval ending 0400 is sent with a Time Code (DTM04) of ED. The Time Code 'ED' will be displayed for every reading until the fall DST where it will change to 'ES' denoting Eastern Standard time.

Example of Spring DST Change with 60-minute interval increments...
QTY~QD~95.58~KH
DTM~582~20150308~0100~ES
QTY~QD~96.9~KH
DTM~582~20150308~0200~ES
QTY~QD~86.7~KH
DTM~582~20150308~0400~ED
QTY~QD~96.9~KH
DTM~582~20150308~0500~ED
QTY~QD~97.44~KH

Version 6.7

30 Minute Interval Increment - Upon the change from Eastern Standard time (ES) to Eastern Daylight time (ED) at 0200, the intervals ending 0230 & 0300 are skipped and the interval ending 0330 is sent with a Time Code (DTM04) of ED. The Time Code 'ED' will be displayed for every reading until the fall DST where it will change to 'ES' denoting Eastern Standard time.

Example of Spring DST Change with 30-minute interval increments...
QTY~QD~239.76~KH
DTM~582~20150308~0130~ES
QTY~QD~302.4~KH
DTM~582~20150308~0200~ES
QTY~QD~248.76~KH
DTM~582~20150308~0330~ED
QTY~QD~241.56~KH
DTM~582~20150308~0400~ED

15 Minute Interval Increment - Upon the change from Eastern Standard time (ES) to Eastern Daylight time (ED) at 0200, the intervals ending 0215, 0230, 0245 & 0300 are skipped and the interval ending 0315 is sent with a Time Code (DTM04) of ED. The Time Code 'ED' will be displayed for every reading until the fall DST where it will change to 'ES' denoting Eastern Standard time.

Example of Spring DST Change with 15-minute interval increments...

QTY~QD~239.76~KH DTM~582~20150308~0145~ES QTY~QD~302.4~KH DTM~582~20150308~0200~ES QTY~QD~248.76~KH DTM~582~20150308~0315~ED QTY~QD~241.56~KH DTM~582~20150308~0330~ED

Fall Daylight Savings Time

60 Minute Interval Increment – Upon the change from Eastern Daylight time (ED) to Eastern Standard time (ES) at 0200, the interval ending 0200 reading is repeated. The first interval ending 0200 represents the last interval for Eastern Daylight time (ED) with a Time Code (DTM04) of ED. The second interval ending 0200 represents the initial interval for Eastern Standard time (ES) with a Time Code (DTM04) of ES. The Time Code 'ES' will be displayed for every reading until the spring DST where it will change to ED denoting Eastern Daylight time.

Example of Fall DST Change with 60-minute interval increments...

QTY*QD*54.87*KH

DTM*582*20151101*0100*ED

QTY*QD*55.62*KH

DTM*582*20151101*0200*ED

QTY*QD*54.71*KH

DTM*582*20151101*0200*ES

QTY*QD*53.46*KH

30 Minute Interval Increment – Upon the change from Eastern Daylight time (ED) to Eastern Standard time (ES) at 0200, the intervals ending 0130 & 0200 are repeated. The interval ending 0200 represents the last interval for Eastern Daylight time (ED) with a Time Code (DTM04) of ED. The second interval ending 0130 represents the initial interval for Eastern Standard time (ES) with a Time Code (DTM04) of ES. The Time Code 'ES' will be displayed for every reading until the spring DST where it will change to ED denoting Eastern Daylight time.

Example of Fall DST Change with 30-minute interval increments...

QTY~QD~18.9~KH DTM~582~20151101~0100~ED QTY~QD~18.63~KH DTM~582~20151101~0130~ED QTY~QD~19.17~KH DTM~582~20151101~0200~ED QTY~QD~19.44~KH DTM~582~20151101~0130~ES QTY~QD~19.575~KH

DTM*582*20151101*0300*ES

DTM~582~20151101~0200~ES QTY~QD~19.17~KH DTM~582~20151101~0230~ES

15 Minute Interval Increment – Upon the change from Eastern Daylight time (ED) to Eastern Standard time (ES) at 0200, the intervals ending 0115, 0130, 0145 & 0200 are repeated. The interval ending 0200 represents the last interval for Eastern Daylight time (ED) with a Time Code (DTM04) of ED. The second interval ending 0115 represents the initial interval for Eastern Standard time (ES) with a Time Code (DTM04) of ES. The Time Code 'ES' will be displayed for every reading until the spring DST where it will change to ED denoting Eastern Daylight time.

Example of Fall DST Change with 15-minute interval increments... QTY~QD~18.63~KH DTM~582~20151101~0115~ED QTY~QD~19.17~KH DTM~582~20151101~0130~ED QTY~QD~19.44~KH DTM~582~20151101~0145~ED QTY~QD~19.575~KH DTM~582~20151101~0200~ED QTY~QD~19.17~KH DTM~582~20151101~0115~ES QTY~QD~18.9~KH DTM~582~20151101~0130~ES QTY~QD~20.115~KH DTM~582~20151101~0145~ES QTY~QD~18.36~KH DTM~582~20151101~0200~ES

QTY~QD~18.765~KH

Pennsylvania Notes

Use

- Transaction is conditional in Pennsylvania. PUC order dated 12/5/2012, Docket # M-2009-2092655, Page 13 requires "all EDCs covered by the smart meter mandates to install the capability to share a minimum of 12 months of historical interval account level or meter level usage via EDI."
- The EDC will provide interval detail at the lowest recorded level. The EGS will not be able to request a specific interval level.
- EDC support of 867HI:

Citizens & Wellsboro – supports; utilizes SU, BQ, FG loops Duquesne – Supports; utilizes account summary loops (SU, BQ & FG) First Energy (ME, PE, PP, & WPP)– Supports; utilizes account summary loops (SU, BQ & FG)

PECO – Supports; utilizes account summary loops (SU, BQ & FG) for MV90 metered accounts and single rate AMI metered accounts. For AMI customers with more than one rate (service point), utilizes rate loops (RT, BQ & FG). PPL EU – Supports; utilizes account summary loops (SU, BQ & FG) UGI – Does not support

• The Pennsylvania default is 12 months of Historical Interval Usage, the following EDCs offer more than 12 months...

PECO – default is 24 months

Implementation Information

PECO – For any HIU in which the data precedes December 2010, PECO is required to force the QTY*01 segment to "actual" because actual versus estimate data is not available for dates preceding December 2010.

PECO – For will implement a new "Rate" (RT) loop that will mimic the existing SU loop structure with the exception of the loop name (RT instead of SU). PECO will implement the RT loop such that a transaction will contain one RT loop for each rate (aka service point) included in the transaction. If the associated account is associated with two rates, then PECO will include two RT loops. Historical interval usage will therefore be provided at the rate level.

Requirements for uniform support of Net Metered Customers: Account Level – both the SU and BQ loops are sent. Supported by Citizens & Wellsboro, DLCO, FE, PECO, and PPL. N/A to UGI as they do not have Interval Metered accounts.

SU (Account Services Summary) Loop –reports consumption summarized/totalized for account by unit of measure for net metered customers. Individual intervals are not reported in the PTD*SU loop.

- 1. All PA EDCs (Excluding FirstEnergy)
 - a. When the customer's consumption is greater than generation for a given service period, the KH will be reported as net consumption (QTY01 w/actual = QD or estimated = KA) with the total generation subtracted from total consumption.
 - b. When the customer's generation is greater than consumption for a given service period, the KH will be reported as net generation (actual = 87 or estimated = 9H) with the total consumption subtracted from total generation).
 - c. In either scenario, the QTY02 will never be signed negative.
- 2. FirstEnergy Companies
 - a. Instead of reporting net KH in the SU loop, FirstEnergy will report the consumption and generation separately in their own loop. The REF*6W Channel ID will identify the appropriate loop
 - i. REF*6W*1 Loop reports consumption (delivered) KH (QTY01 w/actual = QD or estimated = KA)
 - ii. REF*6W*2 Loop reports generation (received) KH (QTY01 w/actual = 87 or estimated = 9H

BQ (Account Services Detail) Loop – reports consumption provided by meter summed to the account level by unit of measure. This will be looped for each month for which the history is being reported.

- 1. All PA EDCs (Excluding FirstEnergy)
 - a. The QTY02 will report the net KH for ALL metered services being summed to the account level for the given reporting period.
 - b. When the net KH for a given report period is generation, the QTY01 will be either '87' or '9H' to denote net generation.
 - c. When the net KH for a given report period is consumption, the QYT01 will be one of the six valid consumption quantity qualifiers.
- 2. FirstEnergy Companies
 - a. Will send two BQ loops, one for consumption (delivered) KH and one for generation (generation) KH
 - b. Consumption (Delivered) loop identified by REF6W = "1" with each interval reported as consumption (QTY01 w/actual = QD or estimated = KA)
 - c. Generation (Received) loop identified by REF6W = "2" with each interval reported as (QTY01 w/actual = 87 or estimated = 9H)
 - i. Generation (Received) loop will be sent even when there is no generation reported for the period.

Change in Interval Data Increment

Meter Level – none of the PA EDCs are reporting Historical Interval usage at the meter level in the EDI 867HI EDEWG may add requirements/examples should any EDC wish to send meter level consumption history in the 867HI.

The PTD01=BQ & PM loops will be repeated when the interval data reporting increment changes. See DTM*328 segment and examples section for additional information.

Historical Usage Matrix for Pennsylvania

PA Change Control 172 approved Historical Usage Matrix version dated February 8th, 2024. The file named PA_Historical Usage Matrix_20240208.xlsx will be available for download from the PAPUC Website under Electricity > Electronic Data Exchange > EDEWG Files.

Maryland Notes

Historical Usage Reporting

• **BG&E:** Historical Usage requests are processed as follows...

LIN05	Scenario	REF1P (Accepted Request)	867 Action
LIN05 =HU	HU available on non-interval account	No REF1P sent	867HU sent
LIN05 =HU	HU not available	REF1P = HUU	No 867 sent
LIN05 =HU	HU available on interval account (AMI & MV90)	No REF1P sent	867HU sent
LIN05 = HI	HI available (AMI & MV90) NOTE: MV90 aggregated to 60 minutes (15 min available on CDWeb)	No REF1P sent	867HI sent
LIN05 = HI	Neither historical interval detail or summary data available	REF1P = HIU	No 867 sent
LIN05 = HI	HI data unavailable BUT summary HU data is available	REF1P = HIU	867HU sent
LIN05 = HI	HI request on non-interval account	REF1P = UMA	867HU sent

• **Delmarva MD & PEPCO MD & Potomac Edison:** The supplier will receive 867HU for non-interval billed accounts and the 867HI for interval billed accounts. Historical Usage requests will be processed as follows:

LIN05	Scenario	REF1P Code	867 Action
LIN05 = HU	HU available on non-interval account	No REF1P sent	867HU sent
LIN05 = HU	HU not available	REF1P = HUU	No 867 sent
LIN05 = HI	HI available	No REF1P sent	867HI sent
LIN05 = HI	Neither historical interval detail or summary data available	REF1P = HIU	No 867 sent
LIN05 = HI	HI data unavailable BUT summary HU data is available	No REF1P sent	867HU sent
LIN05 = HI	HI request on non-interval account	No REF1P sent	867HU sent

Requirements for uniform support of Net Metered Customers

- Maryland EDI Change Control 029 adopted uniform net meter data reporting for Maryland.
- Account Level both the SU and BQ loops are sent. Supported by BGE, Potomac Edison (FE), & PHI companies (Delmarva MD & PEPCO MD).
- SU (Account Services Summary) Loop –reports consumption summarized/totalized for account by unit of measure for net metered customers. Individual intervals are not reported in the PTD*SU loop.
 - 1. When the customer's consumption is greater than generation for a given service period, the KH will be reported as net consumption (QTY01 w/actual = QD or estimated = KA) with the total generation subtracted from total consumption.
 - 2. When the customer's generation is greater than consumption for a given service period, the KH will be reported as net generation (actual = 87 or estimated = 9H) with the total consumption subtracted from total generation).
 - 3. In either scenario, the QTY02 will never be signed negative.
- BQ (Account Services Detail) Loop reports consumption provided by meter summed to the account level by unit of measure. This will be looped for each month for which the history is being reported.

Version 6.7

- 1. The QTY02 will report the net KH for ALL metered services being summed to the account level for the given reporting period.
- 2. When the net KH for a given report period is generation, the QTY01 will be either '87' or '9H' to denote net generation.
- 3. When the net KH for a given report period is consumption, the QYT01 will be one of the six valid consumption quantity qualifiers.

Meter Level – none of the MD Electric Companies are reporting Historical Interval usage at the meter level in the EDI 867HI.

Maryland Energy Assistance Program MD PC55 regulations require Suppliers to be certified by the Maryland PSC to serve customer receiving Energy Assistance. MD EDI CC68v2 addresses changes to the EDI 867 Historical Usage & 867 Historical Interval Usage to support PC55 implementation as follows...

- Add REF*EA (Energy Assistance Customer) to provide the current status of the customer's Energy Assistance in the Utility System at the time of the Historical Usage transaction from the utility
 - It remains the sole responsibility of the Supplier to confirm the Energy Assistance status directly with the customer and/or the Office of Home Energy Programs (OHEP).

The REF*EA is not indicative of the customer's Energy Assistance status in the event the customer is receiving assistance for Gas commodity only or if customer moved into utility service territory and was previously receiving Energy Assistance.

Historical Usage Matrix for Maryland

MD Change Control 083 approved Historical Usage Matrix version dated February 12th, 2024. The file named MD_Historical Usage Matrix_20240212.xlsx will be available for download from the MD PSC Website under Electricity > Working Groups > EDI Standards

New Jersey Notes

Use

- Transaction is optional in New Jersey.
- Atlantic City Electric & Jersey Central Power and Light—ACE and JCPL support the EDI 867 Historical Interval Usage transaction summarized to the ACCOUNT level using the SU, BQ and FG loops. ACE and JCPL will process Historical Usage requests as follows:

LIN05	Scenario	REF1P Code	867 Action
LIN05 = HU	HU available on non-interval account	No REF1P sent	867HU sent
LIN05 = HU	HU not available	REF1P = HUU	No 867 sent
LIN05 = HI	HI available	No REF1P sent	867HI sent
LIN05 = HI	Neither historical interval detail or	REF1P = HIU	No 867 sent
	summary data available		
LIN05 = HI	HI data unavailable BUT summary	No REF1P sent	867HU sent
	HU data is available		
LIN05 = HI	HI request on non-interval account	No REF1P sent	867HU sent

NJ Clean Power Choice

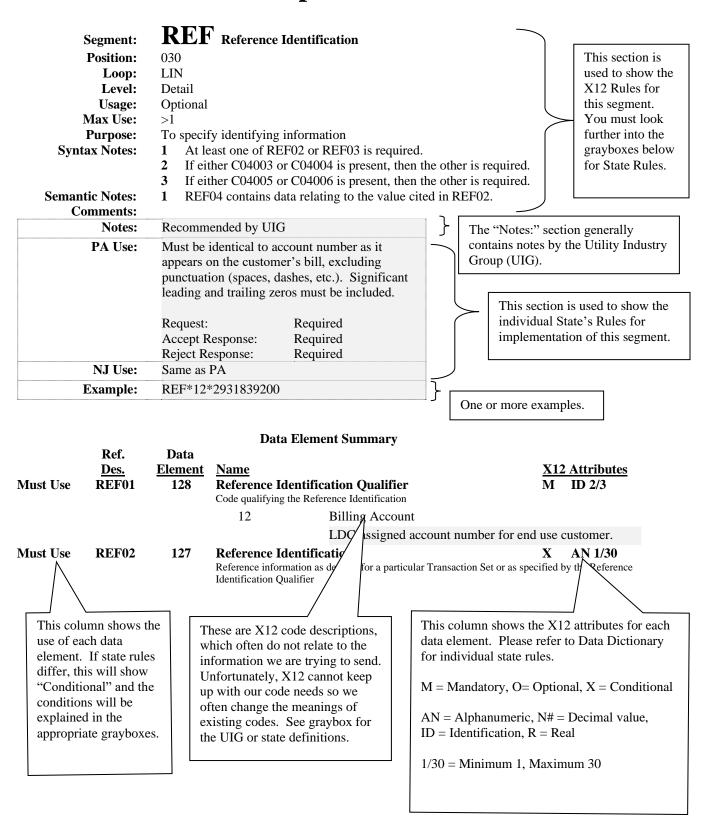

Pursuant to Board Order, Docket No. QO18040393, the Clean Power Choice Program is coming to an end effective February 28, 2019. The EDI segments and data elements used for Clean Power Choice will remain in the EDI Implementation Guidelines to support any cancel/rebill scenarios or for future use in the event another program is established that may need these data elements.

Delaware Notes

Use

• See Delmarva MD under Maryland notes

PTD Loop for Historical Interval Usage Summarized by Account (PTD01 = SU)

A PTD Loop will be provided for each type of consumption measured for y meter (PTD01 = SU) in addition to the detail PTD loop for the meter and the PTD loop that provides Scheduling Determinants when appropriate

13	Loop Identification	Indicates if usage is provided totalized	PTD01 = SU		X(2)
		or by meter.			
14.2	Service Period Start	Start date of the period for which these	DTM02	DTM01 = 150	X(8)
		readings are provided			
14.5	Service Period End	End date of the period for which these	DTM02	DTM01 = 151	X(8)
		readings are provided			
16.2	Quantity Qualifier	Represents whether the quantity is	QTY01		X(2)
		actual or estimated:			
		KA = Estimated Quantity Delivered			
		QD = Actual Quantity Delivered			
		87 = Actual Quantity Received (Net			
		Meter)			
		9H = Estimated Quantity Received (Net			
		Meter)			
16.4	Quantity Delivered	Represents quantity of consumption	QTY02	QTY01	9(15)
		delivered for billing period.			
16.6	Quantity Delivered	Indicates unit of measurement for	QTY03		X(2)
	Unit of Measurement	quantity of consumption delivered			
		during billing period.			

PTD Loop for Historical Usage that is Summarized/Totalized by Rate (PTD01 = RT)

A PTD Loop will be provided for each type of consumption measured for the overall account (PTD01=SU) or by meter (PTD01 = PM) or by rate (PTD01=RT) in addition to the PTD loop that provides Scheduling Determinants when appropriate

Rate Code Rate Sub-class tity Qualifier	A code for the Load Profile used for this rate. Differs by LDC. Codes posted on LDC's Web site. Code indicating the rate a customer is being charged by LDC per tariff. Segment: ST Transaction Set Header

Position: 010

Loop:

Level: Heading Usage: Mandatory

Max Use: 1

Purpose:

To indicate the start of a transaction set and to assign a control number

Syntax Notes:

Semantic Notes: 1 The transaction set identifier (ST01) is used by the translation routines of the

interchange partners to select the appropriate transaction set definition (e.g., 810

selects the Invoice Transaction Set).

Comments:

0 0	
PA Use:	Required
NJ Use:	Optional
DE Use:	Not Used
MD Use:	Same as PA; see Notes section for utility support
Example:	ST*867*000000001

Must Use	Ref. Des. ST01	Data Element 143	Name Transaction Set Identifier Code Code uniquely identifying a Transaction Set	Att:	ributes ID 3/3
Must Use	ST02	329	867 Product Transfer and Resale Report Transaction Set Control Number Identifying control number that must be unique within the transaction set by the originator for a transaction set	M function	AN 4/9 nal group assigned

 $\textbf{Segment:} \quad \textbf{BPT} \text{ Beginning Segment for Product Transfer and Resale}$

Position: 020

Loop:

Level: Heading Usage: Mandatory

Max Use: 1

Purpose: To indicate the beginning of the Product Transfer and Resale Report Transaction Set and

transmit identifying data

Syntax Notes: 1 If either BPT05 or BPT06 is present, then the other is required.

Semantic Notes: 1 BPT02 identifies the transfer/resale number.

BPT03 identifies the transfer/resale date.
BPT08 identifies the transfer/resale time.

4 BPT09 is used when it is necessary to reference a Previous Report Number.

Comments:

PA Use:	Required
NJ Use:	Same as PA; see Notes section for utility support
DE Use:	N/A
MD Use:	Same as PA; see Notes section for utility support

				Used when the quantity delivered is an estimated quantity.
			QD	Actual Quantity Delivered
				Used when the quantity delivered is an actual quantity.
			87	Actual Quantity Received (Net Metering)
				Used when the net generation quantity received is actual.
			9H	Estimated Quantity Received (Net Metering)
				Used when the net generation quantity received is estimated.
Must Use	QTY02	380	Quantity Numeric value of quantity	X R 1/15
Must Use	QTY03	355	Unit or Basis for M Code specifying the units has been taken	leasurement Code M ID 2/2 in which a value is being expressed, or manner in which a measurement
			K1	Kilowatt Demand (KW)
				Represents potential power load measured at predetermined intervals
			K2	Kilovolt Amperes Reactive Demand (KVAR)
				Reactive power that must be supplied for specific types of customer's equipment; billable when kilowatt demand usage meets or exceeds a defined parameter
			K3	Kilovolt Amperes Reactive Hour (KVARH)
				Represents actual electricity equivalent to kilowatt hours; billable when usage meets or exceeds defined parameters
			K4	Kilovolt Amperes (KVA)
			KH	Kilowatt Hour (KWH)

Segment: MEA Measurements

Position: 160
Loop: QTY
Level: Detail
Usage: Optional
Max Use: 40

Purpose: To specify physical measurements or counts, including dimensions, tolerances, variances,

and weights (See Figures Appendix for example of use of C001)

Syntax Notes: 1 At least one of MEA03 MEA05 MEA06 or MEA08 is required.

2 If MEA05 is present, then MEA04 is required.
3 If MEA06 is present, then MEA04 is required.

4 If MEA07 is present, then at least one of MEA03 MEA05 or MEA06 is required.

5 Only one of MEA08 or MEA03 may be present.

Semantic Notes: 1 MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.

Comments: 1 When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed, use MEA05 as the

negative (-) value and MEA06 as the positive (+) value.

Notes:	The MEA segment is sent for each QTY loop. The MEA will indicate the "time of use" that applies to the QTY. If meter readings are included in the MEA, they will indicate the "time of use" that the meter readings apply to.
PA Use:	Optional field for time of use other than totalizer (MEA07=51). Optional for time of use equal to totalizer (MEA07=51) if that is the only time of use on the account.
NJ Use:	Not Used
DE Use:	Not Used
MD Use:	Not Used
Examples:	MEA**PRQ*14*K1***51 (If meter measures multiple things, you need to send multiple QTY loops, one for each unit of measurement).

Data Element Summary

Must Use	Ref. <u>Des.</u> DTM01	Data Element 374	Name Date/Time Qualification Code specifying type of	ier f date or time, or both date and time	At M	tributes ID 3/3
			582	Report Period		
				The date/time of the end of the interval	1.	
Must Use	DTM02	373	Date Date expressed as CCY	YMMDD	X	DT 8/8
Must Use	DTM03	337	HHMMSSDD, where H	our clock time as follows: HHMM, or HHMMSS, $H = 100$, $M = 100$,	r secon	ds (00-59) and
			HHMM format			
Must Use	DTM04	623	Time Code		O	ID 2/2

Code identifying the time. In accordance with International Standards Organization standard 8601, time can be specified by a + or - and an indication in hours in relation to Universal Time Coordinate (UTC) time; since + is a restricted character, + and - are substituted by P and M in the codes that follow

The time code must accurately provide the time zone when the daylight savings time starts and ends if the meter is adjusted for daylight savings time. If meter is not adjusted for daylight savings time, the time code will always reflect Eastern Daylight Time which will be interpreted as prevailing time.

ED Eastern Daylight Time
ES Eastern Standard Time

Segment: PTD Product Transfer and Resale Detail (BO= Interval Summary)

Position: 010
Loop: PTD
Level: Detail
Usage: Mandatory

Max Use: 1

Purpose: To indicate the start of detail information relating to the transfer/resale of a product and

provide identifying data

Syntax Notes: 1 If either PTD02 or PTD03 is present, then the other is required.

2 If either PTD04 or PTD05 is present, then the other is required.

Semantic Notes: Comments:

Notes:	This PTD Loop will be used when providing Historical Interval Usage by meter. The PTD*BO Loops sum the intervals for the month by unit of measure for each meter. In the PTD*BO consumption across intervals and across the same unit of measure is summarized at the meter level by meter cycle reporting period. Demand is never reported in the PTD*BO Loop. Individual intervals are not reported in the PTD01=BO Loop. One PTD*BO loop is required for each meter for each unit of measure. There will be on PTD*BO loop for each month.
PA Use:	Optional - Required if providing Historical Interval Usage by Meter; otherwise, not used.

Loop: PTD
Level: Detail
Usage: Optional
Max Use: 10

Purpose: To specify pertinent dates and times

Syntax Notes: 1 At least one of DTM02 DTM03 or DTM05 is required.

2 If DTM04 is present, then DTM03 is required.

3 If either DTM05 or DTM06 is present, then the other is required.

Semantic Notes: Comments:

Notes:	This date reflects the beginning of the date range for this meter for this billing period.
	This specific PTD loop is required if there are metered services on the account.
	Required, unless a "DTM*514" is substituted for this code.
PA Use:	Optional - Required if providing Historical Interval Usage by Meter; otherwise, not used.
NJ Use:	Same as PA; see Notes section for utility support
DE Use:	N/A
MD Use:	Same as PA; see Notes section for utility support
Example:	DTM*150*20080101

	Ref.	Data				
	Des.	Element	<u>Name</u>		Att	<u>ributes</u>

Segment: QTY Quantity (KC=Peak Load Contribution)

Position: 110
Loop: QTY
Level: Detail
Usage: Optional
Max Use: 1

Purpose: To specify quantity information

Syntax Notes: 1 At least one of QTY02 or QTY04 is required.

2 Only one of QTY02 or QTY04 may be present.

Semantic Notes: 1 QTY04 is used when the quantity is non-numeric.

Comments

Comments:	
Notes:	Each QTY/MEA/DTM loop conveys consumption information about one metering period.
PA Use:	Required - The QTY/DTM loop may be sent twice depending on the time of year the Historical Usage is being provided. (PLC is effective June 1 - May 31) One iteration will show the current PLC and a second iteration will show the PLC that will be effective in the period defined in the DTM segment. Currently the PA EDCs change the PLC effective June 1st. Once the EDCs are aware of what the next effective PLC will be (typically in December) they should begin providing it on transactions. For example, in February 2010 the PLC values would be reported as: QTY*KC*476*K1 DTM*007****RD8*20090601-20100531 QTY*KC*450*K1 DTM*007****RD8*20100601-20110531
	Whereas in September 2010 the PLC value would include only one loop because the following year's PLC is undetermined: QTY*KC*450*K1 DTM*007****RD8*20100601-20110531
NJ Use:	Required for PJM participants; see Notes section for utility support. This will be the Peak Load Contribution in effect when the transaction is requested. NJ Note: PSE&G sends Capacity Obligation to PJM.
DE Use:	N/A
MD Use:	Required for PJM participants; see Notes section for utility support. This will be the Peak Load Contribution in effect when the transaction is requested. Potomac Edison – follows PA use of effective dates where Future Peak Load Contribution is sent when calculated and available.
Example:	QTY*KC*752*K1

Segment: QTY Quantity (KZ=Network Service Peak Load)

Position: 110
Loop: QTY
Level: Detail
Usage: Optional

Max Use: 1

Purpose: To specify quantity information

Syntax Notes: 1 At least one of QTY02 or QTY04 is required.

2 Only one of QTY02 or QTY04 may be present.

Semantic Notes: 1 QTY04 is used when the quantity is non-numeric.

Comments:

Notes:	Each QTY/MEA/DTM loop conveys consumption information about one metering interval.
PA Use:	Required - The QTY/DTM loop may be sent twice when the Utility is providing both the current NSPL and the NSPL that will be effective for a subsequent period. This will occur for short period of time between when the future value is sent via the 814C and the actual date the future value takes effect.
	For example, you may receive either two loops: QTY*KZ*476*K1
	DTM*007****RD8*20100101-20101231
	QTY*KZ*450*K1 DTM*007****RD8*20110101-20111231
	Or just one:
	QTY*KZ*450*K1
	DTM*007****RD8*20110101-20111231
NJ Use:	Required for PJM participants; see Notes section for utility support. This will be the Network Service Peak Load in effect when the transaction is requested. NJ Note: PSE&G sends Capacity Obligation to PJM.
DE Use:	N/A
MD Use:	Required for PJM participants, see Notes section for utility support. This will be the Network Service Peak Load in effect when the transaction is requested. Potomac Edison – follows PA use where Future Network Service Peak Load is sent when calculated and available.
