NOTICE TO PUBLIC SERVICE ELECTRIC AND GAS COMPANY CUSTOMERS

In the Matter of the Petition of Public Service Electric and Gas Company to Modify its Manufactured Gas Plant (MGP) Remediation Component Within its Electric Societal Benefits Charge (SBC) and its Gas SBC; During the Remediation Adjustment Charge (RAC) 30 Period, August 1, 2021 to July 31, 2022

Notice of Filing and Notice of Public Hearings

BPU Docket No. GR23010050

PLEASE TAKE NOTICE that, on January 26, 2023, Public Service Electric and Gas Company ("Public "PSE&G," or "Company") filed a petition and supporting documentation with the New Jersey Board Utilities ("Board" or "BPU") requesting changes in its Manufactured Gas Plant ("MGP") Remediation Service, of Public Utilities ("Board" or "BPU") requesting changes in its Manufactured Gas Plant ("MGP") Remediatic charges, in its Remediation Adjustment Clause ("RAC") component of its Societal Benefits Charge ("SBC"), pursuant to N.J.S.A. 48:2-21 and N.J.S.A. 48:2-21.1 ("Petition"). The Company implemented its RAC in accordance with prior BPU Orders which permit the Company to recover, through successive seven (7) year amortizations, reasonable costs incurred in the Company's MGP program ("Program"). The Program is carried out under the direction and supervision of the New Jersey Department of Environmental Protection and involves the investigation and clean-up of former manufactured gas plant facilities. By the Petition, the Company seeks an Order approving recovery of Program costs incurred during its "RAC 30" period from August 1, 2021 through July 31, 2022 via updated rates effective on or about April 1, 2023. PSE&G requests that the Board increase the Company's current gas RAC rate revenues by approximately \$3.18 million and decrease its current electric RAC rate revenues by approximately \$3.09 million, for a total annual increase of approximately \$0.09 million for customers receiving service under both tariff rates.

Table #1 shows the new proposed RAC rates for electric and gas customers. The allocation to gas contract customers is incorporated based upon the terms of applicable contracts and/or Board Orders, rather than on a volumetric basis.

Tables #2 and #3 illustrate the proposed RAC rates' approximate impact on typical electric and gas customers' residential monthly bills, if approved by the Board.

the Petition, a typical residential electric customer using 740 kilowatt-hor and 6,920 kilowatt-hours annually would see a decrease in their annual bill from \$1,308.20 to \$1,307.60, or \$0.60: approximately 0.05%. Under the Company's proposal, a typical residential gas heating customer using 172 therms per month during the winter months and 1,040 therms annually would see an annual bill increase from \$1,170.82 to \$1,171.96 or \$1.14: approximately 0.10%.

Any rate adjustments with resulting changes in bill impacts found by the Board to be just and reasonable as a result of the Company's petition may be modified and/or allocated by the Board in accordance with the provisions of N.J.S.A. 48:2-21 and for other good and legally sufficient reasons to any class or classes of customers of the Company. Therefore, the described charges may increase or decrease based upon the Board's decision.

The petition is available for review at the PSEG website: http://www.pseg.com/pseandgfilings.

PLEASE TAKE FURTHER NOTICE that, due to the COVID-19 Pandemic, virtual public hearings are scheduled on the following date and times so that members of the public may present their views on the Petition.
